European dry whey prices moved slightly higher. Industry contacts say demand for dry whey has improved seasonally in both food and feed markets. Contacts also suggest plenty of less recent production is available, and once manufacturers can clear those older stocks, more sales opportunities at higher prices may develop. Dry whey production is steady, as milk flows are seasonally lower, but cheesemakers are operating at busy schedules to keep up with cheese demand.

### Prices for: Western Europe, All First Sales, Free on Board - Port, Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/MT: 900 - 1,325
