Subject: All GMOs Need to be Labeled

As a supporter of Just Label It, I want to know what's in my food and how it's grown, especially when it comes to GMOs. I believe that all GMO foods -- including foods with GMO ingredients like refined sugars and oils and foods with ingredients derived from all forms of genetic engineering -- should carry a GMO disclosure.

USDA's General Counsel confirmed that you have the authority to require the disclosure of all GMOs. As you implement the new GMO disclosure law, I am counting on you to do everything in your power to label all GMOs, including refined sugars, oils, and foods produced using all types of genetic engineering.
