Charles M. English, Jr.  
Davis Wright Tremaine LLP  
1919 Pennsylvania Avenue N.W., Suite 800  
Washington, D.C. 20006-3401

Dear Mr. English:

On September 29, 2015, the Organic Trade Association (OTA) and its members submitted a formal request to the U.S. Department of Agriculture (USDA) for a hearing to amend the ten existing Federal milk marketing orders (FMMOs). The proposed amendment would provide a credit to organic fluid milk handlers against their monthly FMMO pool obligations, dependent upon the price paid to dairy farmers for organic milk. On May 10, 2016, USDA received your supplemental submission in support of the initial formal hearing request. USDA is continuing to review the market concerns raised and the information provided in your proposal, along with the supplemental information from your letter dated May 10, 2016.

In addition, USDA received your June 30, 2016, request for data and additional information from AMS, NASS and ERS. The request included:

- *Updated data on previously submitted requests:* The requested data is enclosed.
- *List of Partially Regulated Distributing Plants (PRDPs):* The requested data was provided on September 1, 2016.
- *PRDP volume and utilization data:* The data is unavailable or restricted due to data confidentiality concerns.
- *Milk sold to or on military facilities:* The data is not available because such route dispositions are not tracked separately.
- *PRDP financial impact on producer settlement funds and a breakdown of organic producer receipts:* As discussed, further clarification regarding this request is needed.

At this time, we consider your data request, dated June 30, 2016, complete. We will be happy to work with you on the remaining data request once we receive further clarification. We appreciate the opportunity to assist you with various information and data needs related to your proposal.

Sincerely,

A handwritten signature in black ink, appearing to be "Elanor Starmer", written over a horizontal line.

Elanor Starmer  
Administrator

<b>Total</b>	<b>\$ (6,256,440.11)</b>	

\* Estimated change in value, in dollars and per cwt., caused by removing organic Class I packaged fluid milk sales, as identified by pooling handlers.

This is a calculation requested by the industry. It is not an estimate of Impact of the proposed amendment submitted by the Organic Trade Association on September 29, 2015.

#### **Additional Notes:**

- Routes include packaged organic milk transferred TO pool distributing plants from unregulated or partially regulated plants and sold on routes.
- Routes exclude packaged organic milk transferred FROM pool distributing plants to unregulated or partially regulated plants and sold on routes.
- Routes exclude packaged organic milk sold in area on routes directly from plants that are not fully regulated.
- Analysis excludes organic milk received at pool plants but not pooled per 1124.12(b)(5), "dairy farmers for other markets".
- Organic components (protein and other solids) subtracted reflect the character of organic producer skim milk, not the market average. In the Pacific Northwest, on average, organic milk tests higher than the market average.

\* An organic handler is defined as a regulated plant with organic bulk receipts that bottles and sells organic packaged products.  
( Organic bulk receipts include organic producer receipts along with organic bulk transfers and diversions. )

Data in this table reflects milk identified as organic and pooled on this order. As such, this data may not reflect the total amount of organic milk produced and sold.

INCLUDES ONLY PRODUCER MILK RECEIPTS: DOES NOT INCLUDE BULK TRANSFER RECEIPTS

Data is based on an inference of the organic status of producers as of December 2013.

\* An organic handler is defined as a regulated plant with organic bulk receipts that bottles and sells organic packaged products.  
( Organic bulk receipts include organic producer receipts along with organic bulk transfers and diversions. )

Data in this table reflects milk identified as organic and pooled on this order. As such, this data may not reflect the total amount of organic milk produced and sold.
