### PATCH # 061

**DOCUMENT:** Federal-State Inspection Certificate (FV-184) Handbook, April 1994

**REMARKS:** The following information regarding all certificates completed for the purposes of Commodity Procurement contracts will be edited in the Fed-State Inspection Certificate (FV-184) Handbook to reflect updated information to be placed in REMARKS.

#### Commodity Procurement

The AMS Commodity Procurement Staff buys fresh fruits and vegetables for distribution to various organizations. These purchases are required to be inspected by the SCI Division and Fed-State collaborators for contractual compliance purposes. Before inspecting any of these purchases, each office will receive specific instructions from their respective Federal Program Manager that will provide documentation with specific information, including delivery dates, the commodity, and grade requirements. Do not inspect purchased products until you receive instructions. Do not deviate from the instructions without authorization from Regional Operations Support staff or Fed-State Inspection Management.

The purchase order (PO) contains all the information that is required to be recorded on the issuing certificate. All certificates must contain the following statement:

“Meets (Fails to Meet) the **Requirements of Solicitation** \_\_\_\_, **Solicitation Sales Order number** \_\_\_\_, **Purchase order number** \_\_\_\_, and **Purchase Line Item number** \_\_\_\_.”

If the load/lot fails the requirements an additional statement of “Account \_\_\_\_” will be added to clarify the factor that caused the failure, such as:

“Fails to Meet the Requirements of Solicitation \_\_\_\_, Solicitation Sales Order number \_\_\_\_, Purchase order number \_\_\_\_, and Purchase Line Item number **account** marked size.”

Provide additional information in Remarks as necessary to further clarify the account factor, such as:

“Size marked on cartons is not the size required per the Solicitation.”

For those collaborators completing FEIRS certificates, there is a drop-down remark available to complete this statement efficiently and accurately.

---

This PATCH represents official guidance. This PATCH is scheduled to be incorporated into the document listed above. After incorporation into the document listed above this PATCH will become obsolete. USDA is an equal opportunity provider, employer, and lender.

# Federal-State Inspection Certificate (FV-184) Handbook

# Federal-State Inspection Certificate (FV-184) Handbook

These instructions are intended to supersede all prior instructions regarding Shipping Point certificate writing in the General Shipping Point Inspection Instructions as well as those contained in the various commodity inspection instructions. They are not intended to supersede or change any sampling or grading procedures.

**Instructions for completing the FV-184 certificate that would be in conflict with those in this handbook may not be issued without approval from Headquarters.**

**APRIL 1994**

**This publication may be duplicated without authorization from USDA**

REPRINTED MARCH 2005

## GENERAL INSTRUCTIONS

The Federal-State Inspection Certificate (FV-184) is the only non-commodity specific certificate available from the USDA to certify shipping point inspections. For instructions for completing any of the commodity specific shipping point certificates, contact your supervisor.

These instructions cover the minimum information that is required to be entered on the FV-184. Your Federal or Federal-State supervisor may issue additional instructions that address the concerns of the industry and/or inspection program for a particular State, area, or commodity.

The certificates are accountable documents. Accordingly, the certificates are serially numbered, and each office is supplied with books of certificates bearing consecutive numbers. The certificates should be issued as much as possible in ascending order as numbered. Before a certificate is issued, it is important to check that each certificate copy bears the same number as the original. If a certificate is discovered with serial numbers that do not match the original, the certificate should be voided immediately and each occurrence reported to the Regional/Headquarters office. If for any reason two certificates are given the same number and are issued prior to discovery of the duplicate numbers, all outstanding copies of one set, including the original, should be recalled and a superseding certificate issued. The number of the certificate being superseded and date and time of the inspection shall be included under "REMARKS" of the superseding certificate. In a case where the certificate being superseded and the certificate with the duplicated serial number were issued on the same day and the same time, then the commodity and number of packages (or any other information that makes one certificate different from the other) shall also be included.

Example: REMARKS: This certificate supersedes certificate number M-000000-0 dated January 3, 1994, 8:05 a.m. for 1000 sacks of White Granex-Grano Onions.

Corrections shall *never* be made on the following entries, which are considered vital points of the certificate:

- Carrier initials or numbers
- Date or Time
- Name of applicant or shipper
- Grade statements
- Percentages of defects or size
- Number of containers (when certified by the inspector)

If a mistake is discovered on a vital point **before certificate issuance**, the certificate must be **VOIDED**. If a mistake is discovered on a vital point **after issuance**, the certificate must be **superseded**. Corrections of other information must be initialed by the inspector.

The standardized notesheet, Form FV-184-13, was specifically developed to coincide with the FV-184. Other notesheets may be used at the State program's discretion.

It is mandatory that all information which appears on the certificate be supported by information on the notesheet. However, only such information as needed to complete the certificate or as directed by your supervisor is required on the notesheet.

**Remember, the notesheet should be complete and legible so that any inspector can write a complete certificate from your notes.**

The Data Entry block in the bottom left hand corner of the FV-184 is intended to facilitate automated billing, collection, and data processing procedures. Completion of this section is voluntary, and any State program wishing to use this portion of the certificate for their own purposes may do so.

---

## **LINE-BY-LINE INSTRUCTIONS**

The following are line-by-line instructions for completing the FV-184. Keep in mind that these are the minimum requirements and that any additional instructions by your Federal or Federal-State supervisor must also be followed.

The previous page is an example of an FV-184. A circled number is located in each area of the certificate that corresponds with a numbered heading below. All examples referred to, are in the back of this book.

If there is any unused space left in the body of the certificate after it has been completed, an X or a diagonal line should be drawn across the unused portion to prevent unauthorized entries (see examples).

---

### **(1) SUBLOT**

Whenever only a portion of a lot from a notesheet or from a previously issued master certificate is being certified on the certificate, enter an X in the "SUBLOT" box. For example, a certificate is being written for a trailer load of product that was sampled on a day's run notesheet. This trailer load is a subplot of the day's run. See section (9), "NOTESHEET NO."

---

### **(2) INSPECTION STARTED**

The date and time shown in these blocks on the certificate should be the local time at which the inspection process begins. The inspection process is considered to have begun when the inspector has arrived at the inspection site and the product is available for sampling. Exact time should be recorded unless your supervisor instructs you otherwise. No reference should be made to standard or daylight savings time. If necessary, include leading zeros when completing each area of the date and time section so that all entries are two digit numbers (see examples).

Note: 12:00 noon shall be recorded as 12:00 pm and 12:00 midnight shall be recorded as 12:00 am.

---

### **(3) INSPECTION COMPLETED**

The date and time in these blocks on the certificate should be the local time that the last sample was completed. Otherwise, all instructions from "INSPECTION STARTED" apply.

If a lot is being certified on a conveyance and the loading does not begin until after the inspection is completed, the date and time (beginning and end) of the loading may be entered under "REMARKS" (see Example No. 3). If the inspector does not witness the loading, the load can not be certified to the conveyance.

---

#### **(4) APPLICANT**

The company that requested the inspection and will be paying the fee is the applicant. At shipping point this is usually the shipper. The company name and the city and state where the company is located shall be entered in the "APPLICANT" block.

If the shipper is someone other than the applicant, and the inspection is being performed at the shipper's facility, the shipper's name and location shall be entered in the "INSPECTION POINT" block followed by the word "(SHIPPER)" in parenthesis (see Example No. 1). If the applicant is not the shipper and the inspection point is not at the shipper's facility, the shipper's name and location shall be entered under "REMARKS."

---

#### **(5) INSPECTION POINT**

The inspection point is the actual location where the inspection was performed. If the inspection point is in the same company and location described in the applicant block, it is permissible to enter "Same" in this block or "Applicant's packing shed," "Applicant's Warehouse," etc. If an applicant has more than one facility, enter the locally accepted name of the facility, such as "Applicant's Warehouse #1," "Plant #3," etc. In such cases it will not be necessary to enter the city and state again. If the inspection site is in a different city than is noted in the "APPLICANT" block, show the city, state and location where the inspection was performed. If the shipper is someone other than the applicant, enter "Shipper's warehouse," "Shipper's packing shed," etc. and enter the city and state.

---

#### **(6) CONVEYANCE NO.**

Under "CONVEYANCE NO." enter the identifying number of the conveyance such as the trailer license number, rail car number, etc.

Under "TYPE" enter the type of conveyance such as "open top trailer," "vented van," "rail car," etc.

If the load is not being certified to the conveyance but the applicant is providing the conveyance number, enter "Applicant states" and enter the number

provided. It is not necessary to enter the type if the applicant provides the conveyance number. If a conveyance number is entered in this block and is not qualified by a term such as "Applicant states," it means that the inspector observed the product on the conveyance.

If the load is not being certified to a conveyance and the applicant is not providing the conveyance number, enter "Lot inspection."

**Note: The "CONVEYANCE" block should never be left blank. Either the conveyance number certified by the inspector or stated by the applicant or "Lot inspection" must be entered in this block.**

---

### **(7) PLI**

Only Federal or Federal-State Positive Lot Identification numbers are to be entered in this block. If more than one lot is being certified and each lot has its own separate PLI number, enter "See below" in this block and write in the PLI number under the "DESCRIPTION OF PRODUCT" section in the body of the certificate with each lot (see Example No. 1). Any PLI number that is entered in the "PLI" block applies to all lots entered on the certificate.

If a situation arises where more than one PLI number would cover all lots on the certificate and there is not adequate space in the "PLI" block, it is allowable to cross out "Other ID" in the next lower block and enter the additional PLI numbers in that block. If this still would not allow adequate room for the PLI numbers, enter "See REMARKS" in the "PLI" block and list all the PLI numbers under "REMARKS."

If no PLI number is being noted on the certificate, the "PLI" block shall be lined or X'd out.

---

### **(8) OTHER ID**

The "OTHER ID" block is used to enter any identifying marks other than Federal or Federal-State PLI. These would include grower numbers, State lot numbers, P.O. numbers, Bill of Lading numbers, etc. The use of this block is optional but should be used if the applicant requests that additional identification be noted or if your supervisor specifies that additional identification be used.

If there is not adequate space in the "OTHER ID" block, enter "See Remarks" and list all additional identification under "REMARKS."

If no additional identification is being noted on the certificate, the "OTHER ID" block shall be lined or X'd out.

---

**(9) NOTESHEET NO.**

If the certificate is being written from notes on a serially numbered notesheet, the serial number(s) shall be entered in the "NOTESHEET NO." block (see Example No. 1). If the certificate is being written from a previously issued master certificate, the word "NOTESHEET" should be crossed out and "Certificate" written in and the certificate number should be entered in this block. In this case, the "SUBLOT" check box at the top of the certificate should be checked.

If there is not adequate space in the "NOTESHEET NO." block to list all notesheet or certificate numbers, enter "See REMARKS" and list the numbers under "REMARKS" and note whether they are notesheet or certificate numbers.

If the "NOTESHEET NO." block is not being used, it should be lined or X'd out.

---

**(10) PRODUCT / VARIETY**

The common name of the commodity is to be shown under the "PRODUCT/VARIETY" heading. The type, when applicable, may also be shown under this heading or if the type is marked on the container it may be entered under the "DESCRIPTION OF PRODUCT" heading. Variety may also be shown under the "PRODUCT/VARIETY" heading. The certificate provides a disclaimer stating that the variety is not being certified by the inspector.

---

**(11) NUMBER AND SIZE OF CONTAINER**

The number of containers must be entered under this heading along with the type of container, such as "sx," "ctns," etc. If the size of the container is not included with the container markings under "DESCRIPTION OF PRODUCT" it will be acceptable to state under this heading "25 lb. size sx," "50 lb. size ctns," etc. If the lot is bulk, state "bulk" and enter the weight. If the lot is in bins, state "bulk bins."

The certificate provides a disclaimer stating that the number of containers is not being certified by the inspector unless otherwise noted. If the inspector is certifying the number of containers a statement such as the following must be made under "REMARKS" (See Example No. 3):

REMARKS: Number of containers certified by Inspector

If a statement such as this is not made, the number of containers may be changed by crossing out the number with a single line and entering the corrected number. The inspector shall initial the correction. If the number of containers is

being certified by the inspector, the only way it can be corrected is to supersede the certificate.

For multiple lots when only certain lots are being counted by the inspector, an asterisk shall be placed immediately before each count being certified by the inspector with a statement such as the following under "REMARKS:"

REMARKS: Number of containers marked with asterisk certified by  
Inspector

---

## **(12) DESCRIPTION OF PRODUCT**

The brand on the container must be entered under this heading. If a brand is not marked on the container, enter "No brand." Any other markings on the container may be entered under this heading such as net weight, size of container, count, size, pack, etc.

Any descriptive information about the lot may also be entered under this heading, such as percentage of defects, offsize or decay, condition of load or container, etc.

If a lot is in grade, it is not necessary to state the percentage of decay or whether the offsize or defects are within or average within tolerance unless your supervisor has instructed you otherwise or it is requested by the applicant. If a statement is made about either the offsize, defects or decay, then the others must be stated also, although if decay is stated along with the grade, it is not necessary to repeat it under this heading. If a lot is reported as failing to grade, a statement must be made as to the percentage of defects, offsize and decay. For a percentage grade lot, it is not necessary to show the range of defects and the percentage of decay unless the lot is also being shown as failing to meet a grade or marketing order. When a pear or apple lot is being certified after storage or transit, and the grade statement is being qualified by a defect(s) being a factor of condition, the percentage of grade defects and the percentage of each condition defect (including decay whether present or not) must be shown along with the percentage of offsize.

Size statements will be made under "DESCRIPTION OF PRODUCT" when applicable. If a size statement is made in conjunction with a grade statement, it will not be necessary to repeat it under this heading unless a statement is being made as to the percentage of offsize or if the applicant requests a more detailed size statement.

---

**(13) GRADE**

Under this heading a grade statement must be entered when applicable. Individual commodity handbooks give full instructions for writing grade statements along with any complementary size statements when required. If a product is being inspected that has no standard, enter "No established U.S. grade" (see Example No. 2).

Under this heading, the vertical lines on either side are dotted. This allows for any unused space immediately on either side to be used when there is not adequate space between the lines.

---

**(14) Blank Heading**

The blank heading on the far right side of the certificate, next to the "GRADE" column, is intended to be used to show the hundredweight or State or Country of origin for the State programs that wish to provide this information.

If hundredweight is being provided, enter "CWT" in the blank box in the heading and enter the hundredweight in the column below beside each lot (see Examples No. 1 and No. 4).

If State or Country of origin is being provided, enter "Origin" in the blank box and enter the State or Country of origin in the column below beside each lot.

Use of this heading is optional. If this heading is not being used, the space under this heading should be used as additional space for the grade statement.

---

**(15) ABOVE PRODUCTS MEET REQUIREMENTS OF MARKETING ORDER ...**

If a product(s) is being certified under a marketing order, and the product(s) meets the requirements of the marketing order, the marketing order number must be entered in the box directly to the right of this statement (see Example No. 3). If a certificate is being written on a product(s) that fails to meet requirements of a marketing order, the certificate must show this by drawing a line through the word "meet" and adding the word "fail" directly above and entering the marketing order number in the box directly to the right of the statement.

---

**(16) REMARKS**

The "REMARKS" section will be used to enter PLI or other ID when adequate space was not available in the appropriate blocks on the upper portion of the

certificate. The "REMARKS" section may also be used for any other information for which a heading or block was not provided. If adequate space is not available under "REMARKS," any unused portion of the body of the certificate may be used beginning with the term "REMARKS:."

---

**(17) INSPECTOR'S SIGNATURE**

This block is provided for the inspector's signature. The person signing the certificate must be one of the following: 1) The inspector who performed the inspection; 2) Another employee of the Inspection Service who has been given power of attorney by the inspector and has been authorized by the AMS Administrator to affix the inspector's signature to an inspection certificate; or 3) Another employee of the Inspection Service who has been authorized to act in a supervisory capacity.

A supervising inspector should only sign a certificate for another inspector when, for whatever reason, the inspector is not available to sign the certificate and it would be impractical to have the applicant wait until the inspector is available.

When a supervising inspector signs a certificate for another inspector the name of the inspector that performed the inspection shall be printed in **ALL CAPITAL LETTERS** in the upper portion of the "INSPECTOR'S SIGNATURE" block with the supervising inspector's signature in the bottom portion of the block preceded by the the word "By" and followed by "Supervising Inspector" which may be abbreviated as "Supv. Insp." (see Example No. 4)

---

**(18) DATE ISSUED**

In this block enter the date the certificate is actually issued which may not necessarily be the date the inspection was performed. Abbreviations or numbers may be used to indicate the month unless your supervisor instructs otherwise.

---

**(19) FEE BLOCK**

Your State program will provide instructions for assessing the fee. Lines have been provided for the fee, overtime (OT) and expenses (EXP).

---

**(20) ESTIMATED TOTAL**

The total fee shall be entered in this block which includes any overtime, expenses or other assessments that are being charged to the applicant. Although this is headed as an estimated total, this total should be as accurate as possible.

---

## **Certifying Product for 8e Import Requirements or Government Purchases**

When certifying product for 8e import requirements, a statement must be made under "REMARKS" as to whether the lot passes or fails as follows (See Examples No. 5 and No. 6):

REMARKS: Meets (or Fails) U.S. Import Requirements

For Government purchases, a statement must be made under "REMARKS" as follows (see Example No. 2):

REMARKS: Meets the requirements of Announcement FV-\_\_\_\_,  
Invitation No. \_\_\_\_, Ammendment No. (if ammended) \_\_\_\_.  
The above lot was personally counted by the undersigned.  
Contract No. \_\_\_\_\_  
Notice of Delivery No. \_\_\_\_\_  
Delivery Order No. \_\_\_\_\_

**Reminder:** Any unused portion of the body of the certificate may be used when adequate space is not available in the "REMARKS" section.

---

## EXAMPLES

The following examples are intended only as guides. Since each State program may have its own unique concerns and priorities, a certificate written in one State may look somewhat different than one written in another State. Any information included on the following example certificates that is not specifically addressed in this handbook is provided for informational purposes only and is not intended to set precedent over instructions that have been issued by your supervisor or included in any of the commodity handbooks.
