

**USDA SPECIFICATION FOR CERTIFICATION OF BEEF CARCASS  
QUALITY AND YIELD CHARACTERISTICS OF OFFICIALLY GRADED BEEF**

This specification is for certification by an Agricultural Marketing Service (AMS) grader of U.S. Prime and Choice, steer and heifer beef carcasses which: (a) are derived from cattle that meet the phenotypic or genotypic (AngusSource®) requirements of the USDA Specification for Characteristics of Cattle Eligible for Approved Beef Programs Claiming Angus Influence (AAA), and (b) meet the following set of requirements:

1. A marbling score of Modest or higher;
2. Overall A maturity in the U.S. Prime and Choice grade;
3. Medium or fine marbling texture;
4. Moderately thick or thicker muscling and tend to be at least moderately wide and thick in relation to their length;
5. No hump exceeding 2 inches in height;
6. Practically free (not detracting from visual quality) of capillary rupture in the ribeye muscle, and
7. Free of “dark cutting” characteristics.

Items 1 and 2 shall be determined in accordance with the “Official United States Standards for Grades of Carcass Beef.”

Item 3 shall be evaluated using the USDA-AMS-LS-SB-02 Marbling Texture card.

Item 4, muscle thickness, is evaluated by averaging the thickness of the various parts, considering not only the proportion (%) each part is of the carcass but also the general value of each part. Superior muscle thickness implies a high proportion of meat to bone and a high proportion of the weight of the carcass in the more valuable parts.

Item 5 shall be measured from a line formed by the extension of the top line (including the fat) and measuring the lean muscle (excluding the fat) perpendicular to that line in the center of the hump.

**CERTIFICATION**

Carcasses to be examined for compliance with the requirements of this specification shall be clearly identified when presented to the AMS grader for certification. Procedures for identification, certification, the removal of preliminary identification marks (or other methods of control) from non-qualifying carcasses, and control of certified carcasses shall be in accordance with established Quality Assessment Division (QAD) procedures. The AMS grader shall certify acceptable carcasses and complete the appropriate sections in the Conformance Assessment Management System (CAMS).

The costs of all grading and certification services performed by the AMS grader involving examinations, supervision, official documentation, and related services shall be borne by the person, group, or plant requesting the service.

**LABELING**

Labeling of High River Angus Exclusive products shall be in compliance with Food Safety and Inspection Service regulations and policy guidelines, QAD instructions and Livestock and Seed Program Policy Standardization Procedure 2 (LS Policy SP2).
