

## Negotiated Cattle 0-14 and 15-30 Day Delivery Period Report Update

November 15, 2017

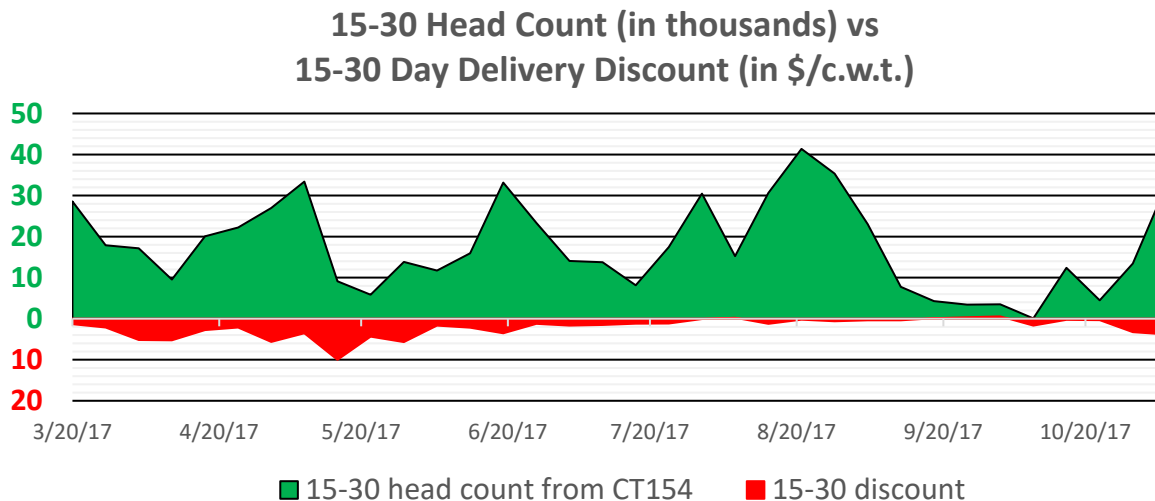

### Overview

Beginning November 14, 2017, the [AMS National Weekly Fed Cattle Comprehensive report](#) now includes weighted average negotiated cattle prices for 0-14 and 15-30 day delivery periods. A new section titled “Weekly Negotiated Avg. Price by Delivery Period,” highlights negotiated prices and volumes for beef-type cattle sold on a national basis with live sales converted to dressed.

In April 2017, AMS conducted a study of the 0-14 and 15-30 day delivery periods to evaluate whether these two delivery periods could be reported separately and still meet the Livestock Mandatory Reporting (LMR) [3/70/20 confidentiality guideline](#) in order to be published, and evaluate the price differences between the two delivery periods.

Initially, the study, [Negotiated Cattle Delivery Period Analysis](#), found that the two delivery periods could not be broken out separately in the 5-area feeding regions, while still preserving confidentiality. AMS continued to track data after the study and as trends and market participants changed, analysis has shown the two negotiated delivery periods are passing confidentiality on a national basis; therefore, the prices can be reported. Beginning in March 2017, the 0-14 and 15-30 day negotiated delivery periods began consistently passing the LMR confidentiality guideline, with this pattern continuing throughout much of the year.
