

## **NOSB Resolution on Origin of Livestock Rulemaking October 26, 2018**

It has come to the attention of the National Organic Standards Board (NOSB) that the continued state of varying interpretations and practices around the Origin of Livestock standards is creating market instability for organic producers. The 2015 USDA Origin of Livestock Proposed Rule was based on six recommendations from the NOSB between 1994 and 2006. The proposed rule responds to findings from the July 2013 USDA Office of Inspector General (OIG) audit report on organic milk operations stating that certifying agents were interpreting the origin of livestock requirements differently<sup>1</sup>. Rulemaking is necessary to ensure consistent interpretation and enforcement of the standards for origin of livestock and provide industry with additional clarity of application of the organic dairy standards. In early 2017 the Origin of Livestock Proposed Rule was removed from the Unified Agenda of Regulatory and Deregulatory Actions. Support for this rule has been expressed through public comment by the majority of organic stakeholders<sup>2</sup>. Strong federal oversight is essential for creating a fair and level playing field for all certified organic operations. **Therefore, be it resolved by unanimous vote, the National Organic Standards Board—as USDA’s Federal Advisory Board on organic issues and representing organic farmers, ranchers, processors, retailers and consumers—urges the Secretary to directly issue a final rule for Origin of Livestock that incorporates public comments submitted in response to the Proposed Rule (Docket Number AMS-NOP-11-0009).**
