

YEAST DERIVATIVES

Motion: Yeast Derivatives should be considered NATURAL.

Vote tallies

Yea	Nay	Abstain	Absent
Dave, Michael, George			Jim, Nancy, Becky

Background:

- Yeast derivatives, like Cell Wall Carbohydrates, are extracted from non GMO bakers yeast an allowed non synthetic. They are further refined than CWCs by additional aqueous extraction.
- As a natural they are already approved for use without needing to be listed.
- Effective against Pathogens by Competitive Exclusion.

Summary of Opinion:

- See Cell Wall Carbohydrates
