To USDA.

As a dairy farmer the price of milk has to change we got more for milk 20 years ago. We need cost of production plus a profit

There needs to be a change in the way milk is priced.

I told a representative the people don't want local grown food anymore. they say farmer should not haul manure or anything that makes the air smell or dirt on a road so when we export most of our food and they get us over a barrel with food like they do oil you can share a hot dog with five of your neighbors for lunch.

Dairy farmers need better pricing.

Thanks
